### HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies.

If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above.

If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)".

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.**

### DETAILED ACTION

This is in response to the BPAI decision on 19 November 2012.

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Posa, Reg. No. 37,424, on 15 March 2013.

The application has been amended as follows:

1. (Currently Amended) A distributed network computing environment, comprising:

a plurality of computer-based clients communicating within a multicast cloud distributed computer network using content-specific data within messages to implement data routing and message culling in a groupware application;

each computer-based client including a processor and memory, with instructions stored in the memory and executed by the processor; and

one or more ~~network~~ routing modules in the network, or router-embedded applets, operative, in addition to normal packet-routing, to permit or inhibit the distribution of a particular message based upon the content of the message.

11. (Currently Amended) A distributed network computing environment, comprising:

a network-enabled ~~client~~ application running on a computer-based client;  
the computer-based client including a processor and memory, with instructions stored in the memory and executed by the processor;

Art Unit: 2452

at least one lobby manager that facilitates communications between the client application and a federation; and

one or more ~~network~~ routing modules in the network, or router-embedded applets, operative, in addition to normal packet-routing, to permit or inhibit the distribution of a particular message based upon the content of the message to reduce the communications with the federation.

The specification has been amended as follows:

Specification Page 13 line 20: remove “The official document can be found at <http://hla.dmsso.mil/tech/rules.html>.”

Specification Page 13 line 22 – page 14 line 1: remove “The official document can be found at <http://hla.dmsso.mil/tech/ifspect.html>.”

Specification Page 14 lines 14-15: remove “The official document on OMT can be found at <http://hla.dmsso.mil/tech/omtspec.html>.”

Specification Page 35 lines 5-6: remove “For detailed specifications of genera-purpose attribute set definitions in Government defined DMSO FED files, refer to <http://hla.dmsso.mil/sdc/rtd/rting-13v2/refD.pdf>.”

### ***Allowance***

The following is an examiner’s statement of reasons for allowance:

With respect to claim 1, the prior arts of record, singly or in combination, fail to teach the features of claim(s) limitations thereof. Specifically, inter alia, it fails to teach a distributed network computing environment incorporating “a plurality of clients in communication within a multicast cloud distributed network

Art Unit: 2452

using content-specific data within messages to implement data routing and message culling in a groupware application; and one or more network routing modules or router-embedded applets operative, in addition to normal packet-routing, to permit or inhibit the distribution of a particular message based upon the content of the message”.

With respect to claim 11, the prior arts of record, singly or in combination, fail to teach the features of claim(s) limitations thereof. Specifically, inter alia, it fails to teach a distributed network computing environment incorporating “at least one lobby manager that facilitates communications between the client application and a federation; and one or more network routing modules or router-embedded applets operative, in addition to normal packet-routing, to permit or inhibit the distribution of a particular message based upon the content of the message to reduce the communications with the federation”.

With respect to claims 1 and 11, examiner also refers to the explanations provided in the BPAI decision from 19 November 2012 in page 8 paragraphs 1-2 under the Analysis heading, page 9 lines 14-22, page 11 lines 8-15, and page 12 lines 7-11.

Claims 2-10 and 12-23 further limit the allowed claims and are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
